Displaying map properties with show_map_info

Typical cryo-EM map:

Center: $(0,0,0)$

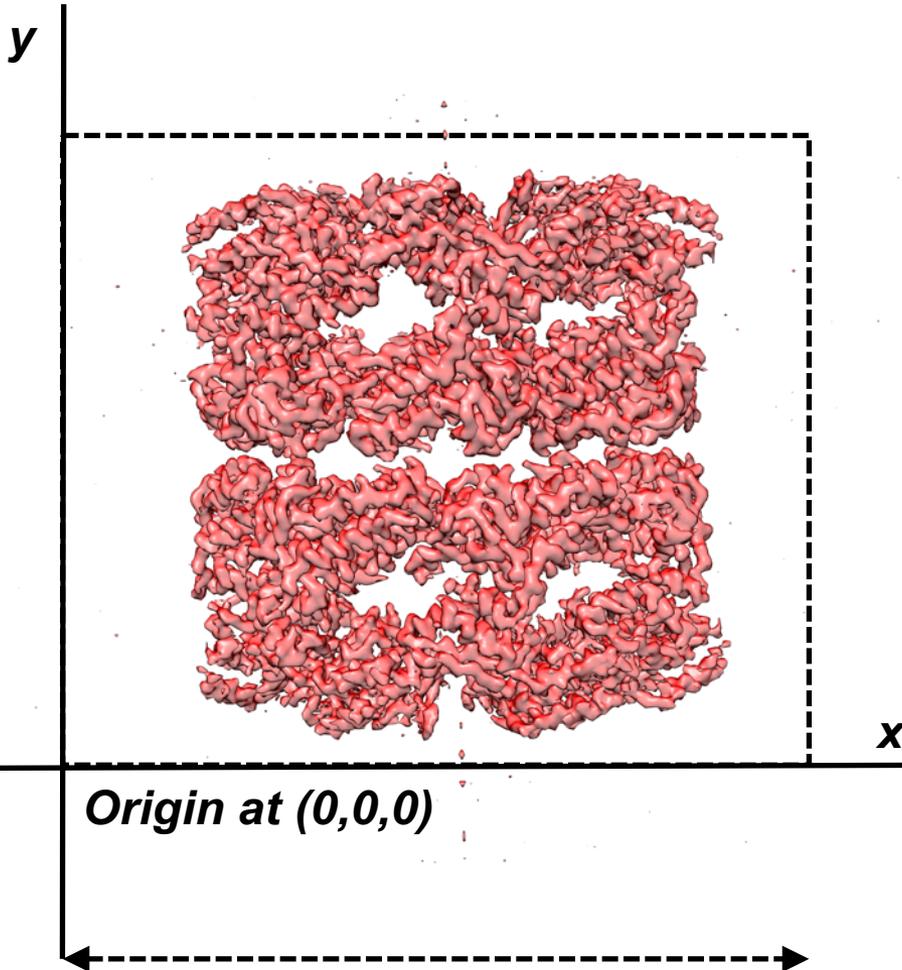

Origin: $(-128, -128, -128)$

Extent (map size):
 $256, 256, 256$

Unit cell grid:
 $256 \times 256 \times 256$

Unit cell:
 $300 \text{ \AA} \times 300 \text{ \AA} \times 300 \text{ \AA}$

Map with origin at (0, 0, 0)

Origin at (0,0,0)

Unit cell grid: (256 x 256 x 256)
Unit cell: 300 Å x 300 Å x 300 Å

Center: (128, 128, 128)

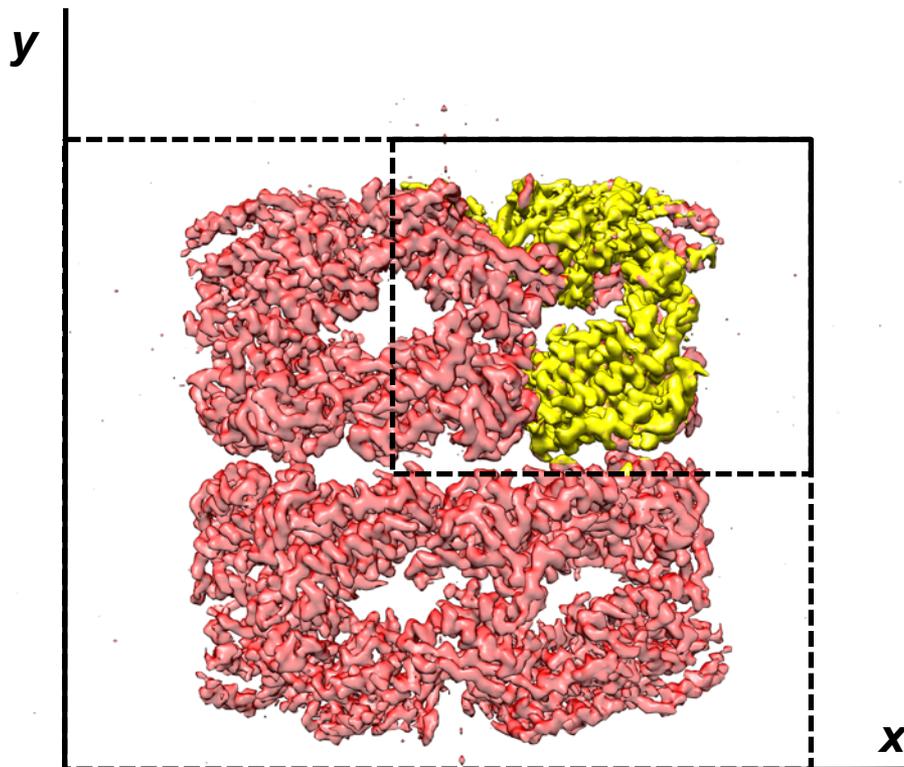

Origin: (0, 0, 0)

Extent (map size):
256, 256, 256

Unit cell grid:
256 x 256 x 256

Unit cell:
300 Å x 300 Å x 300 Å

Cutting out part of a map with map_box

Origin at (0,0,0)

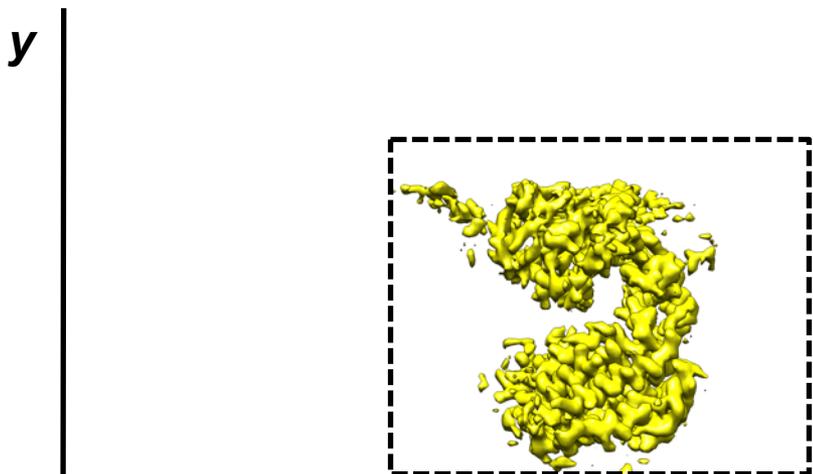

Unit cell grid: (256 x 256 x 256)

Unit cell: 300 Å x 300 Å x 300 Å

Boxed map

Box cut from 100 – 256 in
each direction

Displaying map properties with show_map_info

Origin at
(100, 100, 100)

x

Unit cell grid: (256 x 256 x 256)
Unit cell: 300 Å x 300 Å by 300 Å

Boxed map

Origin: (100, 100, 100)

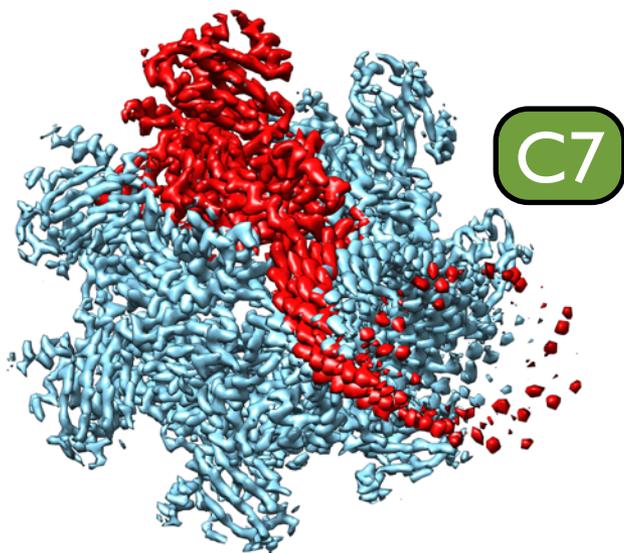

Extent (map size):
156, 156, 156

Box map cell:
183 Å x 183 Å x 183 Å

Unit cell grid:
256 x 256 x 256

Unit cell:
300 Å x 300 Å x 300 Å

Finding map symmetry with symmetry_from_map

Procedure for finding symmetry:

- Test point group symmetries (e.g., C7, D2, I, O, T)
- Helical symmetry
- Principal rotation axes along z, x, y
- Score based on map correlation for symmetry-related points and number of operators

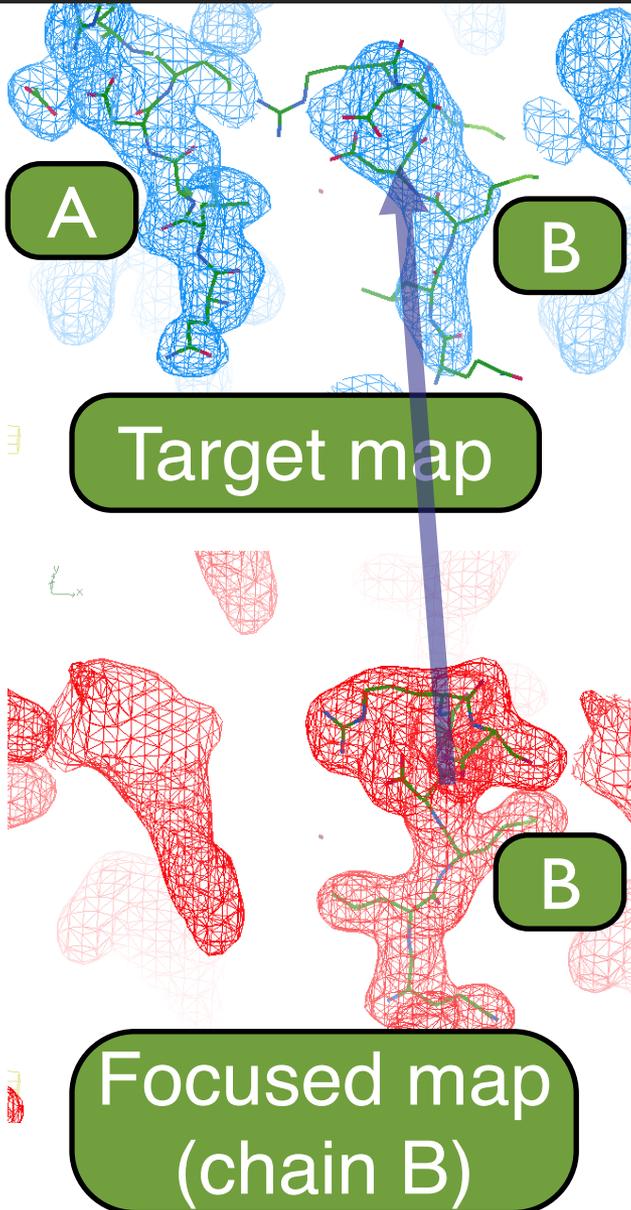

Extracting unique part of map with map_box (extract_unique option)

Procedure:

- Use symmetry of map
- Contour map at level that yields regions about 50 residues in size
- Group symmetry-related regions
- Choose one member of each group
- Optimize compactness and connectivity of unique part of map

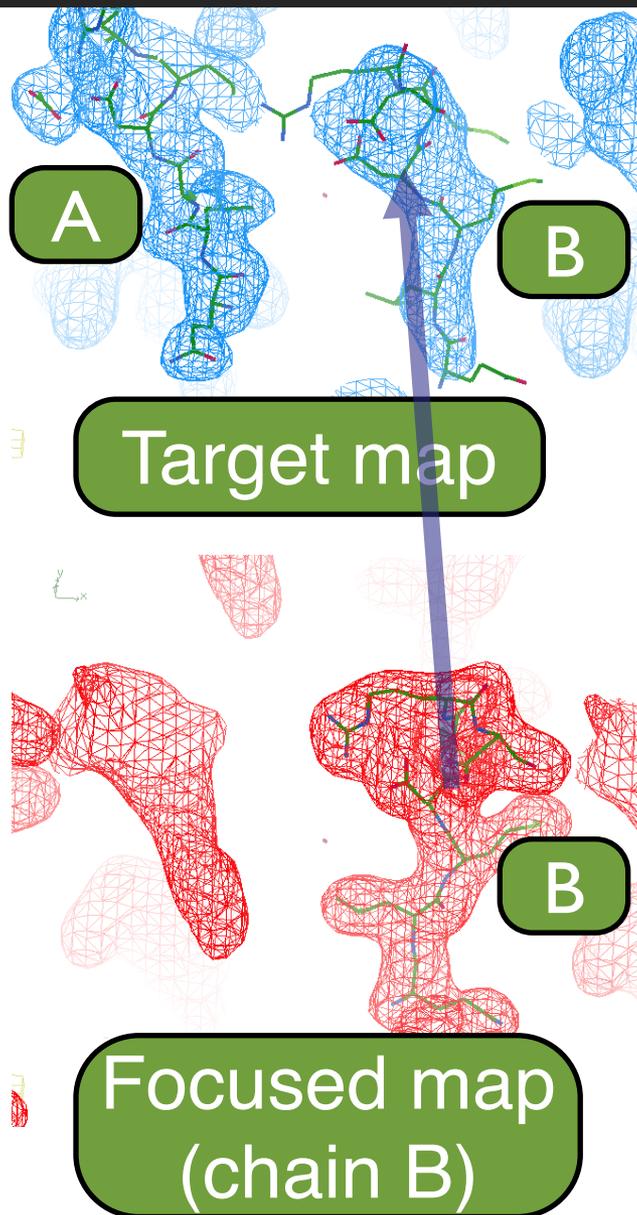

Combining maps with combine_focused_maps

Procedure for combining maps:

- Superimpose density
- Rotation/translation from refined models
- Average target and focused map density
- Weight using map-model correlations

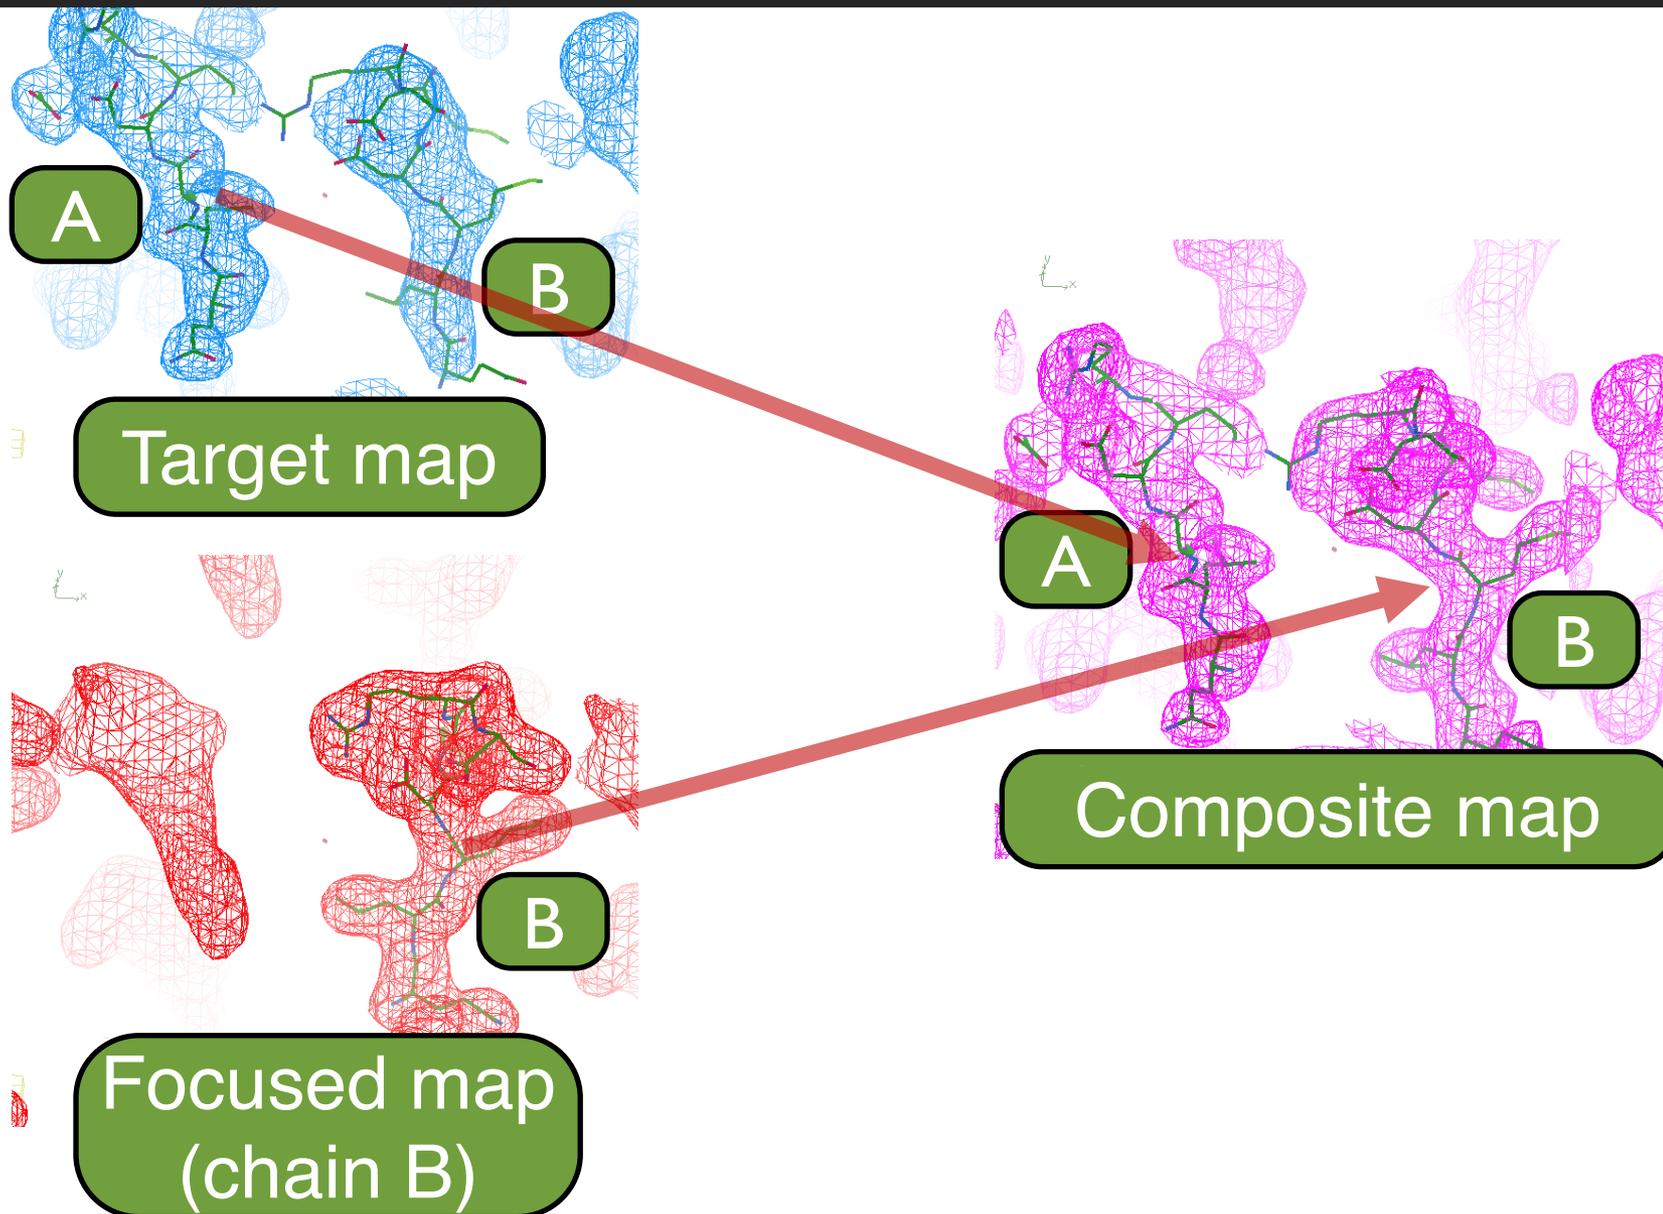

Combining maps with combine_focused_maps

Features

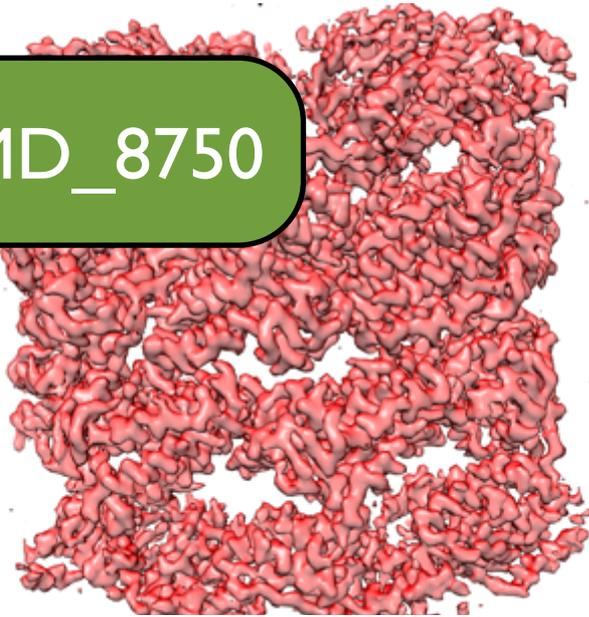

- Averaging of entire chains or local regions
- Application of symmetry to focused map (e.g., superimpose chain B of focused map on chains EFGH of target map)

Combining maps with combine_focused_maps

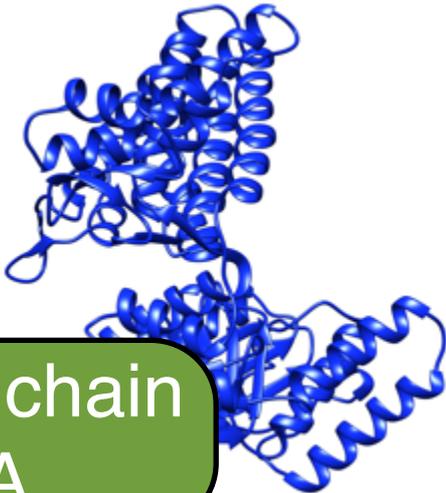

Docking models with dock-in-map

EMD_8750

1ss8 chain
A

Search procedure:

Pure translation

- low-res
- high-res

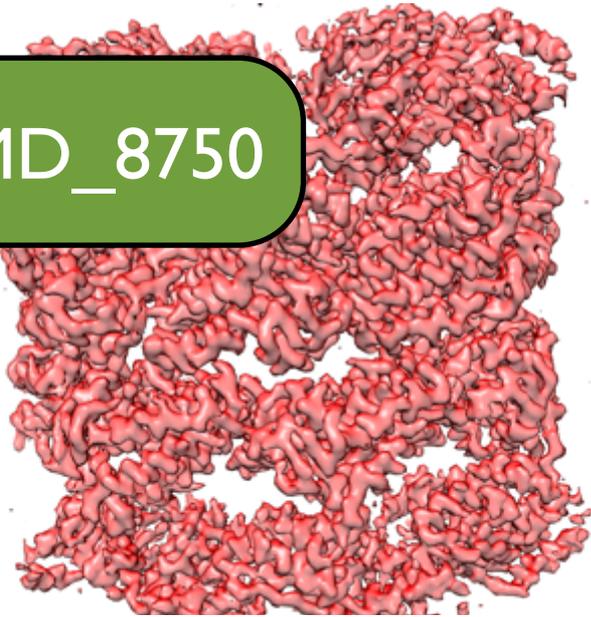

Rotation / translation

- low-res
- high-res

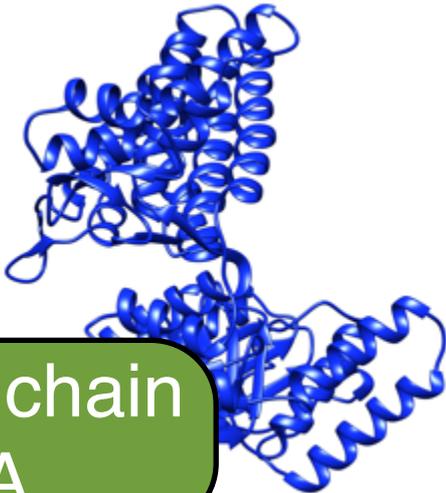

*Score based on rigid-body
refinement map-model correlation*

Docking models with dock-in-map

EMD_8750

1ss8 chain
A

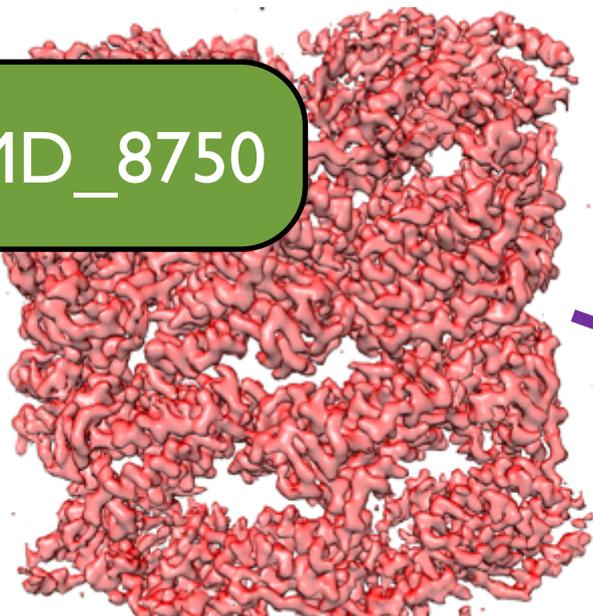

Features

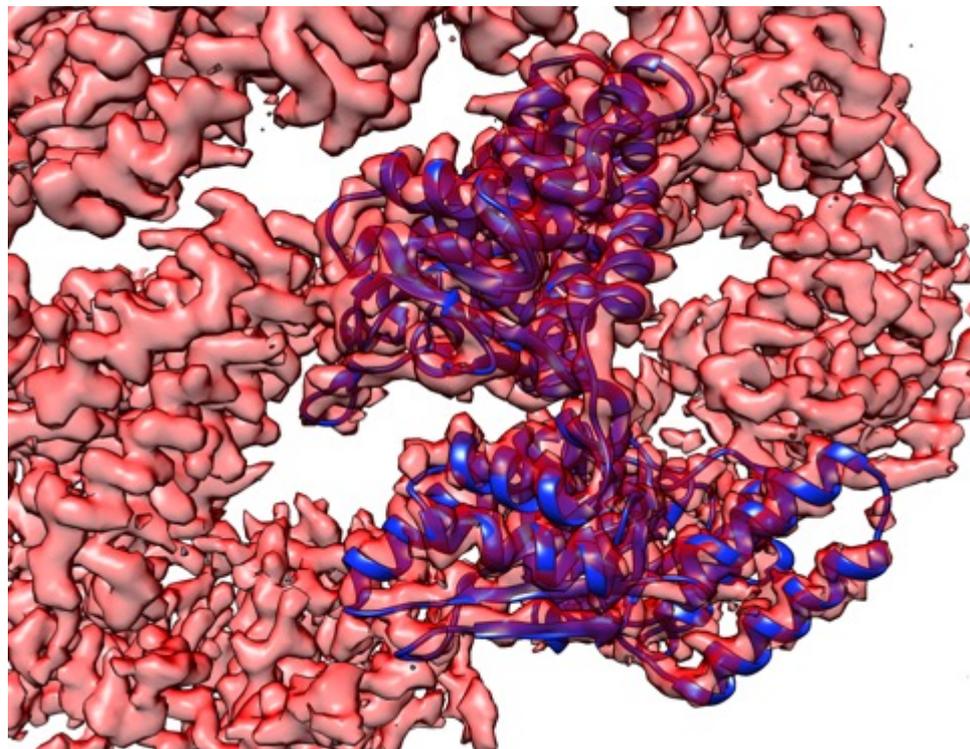

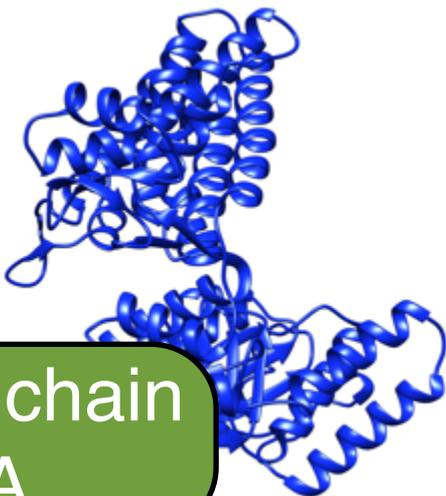

- Multiple chains
- Density search
- Symmetry
- Multiprocessing

Docking models with dock-in-map

EMD_8750

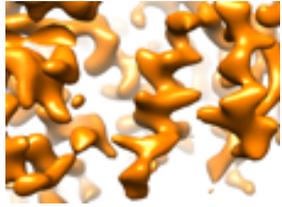

1ss8 chain
A

1ss8 chain A docked
in map
